

EROSION CONTROL & STORMWATER INFILTRATION PLAN

PROPERTY INFORMATION

Owner Name:	Phone:
Mailing Address:	Project Address:
City, State, Zip Code:	Project Start Date:
Email:	Name of Body of Water:
Directions to Site:	
Project Type: (Riprap, House, Etc.)	

PROJECT PLAN (site as viewed from above)

Base Sketch should include: (1) Boundaries of the property; (2) Location and measurements of existing structures, and proposed new structures/additions; (3) the ordinary high water mark (OHWM) of the water body; (4) North Arrow; (5) scale or measurements of buildings to OHWM

Overlay Sketch should show: areas of potential erosion, remedies/practices for temporary erosion, and remedies/practices for permanent erosion, stockpile locations and any other unique features.

Scale:

1 inch = ____ feet

Legend:

Property Line

Drainage Path

Stockpiled Soil

Silt Fence

Disturbed Area

Use area below to add to legend

Note any details pertaining to plan/project not included on sketch above:

PLAN CHECKLIST/MAINTENANCE AGREEMENT

Plan must be sent to and approved by County Land and Water Conservation Department before construction begins. Each line below must be initialed by landowner or representative agent. This plan will not be approved unless each line is initialed when submitted.

Initials:

_____ Landowner and Contractor/Excavator are aware of/understands plan and consequences of not following plan (stop work order, citation).

_____ Practices listed on pg. 1 of this plan are in place before construction begins.

_____ Site will be inspected by Landowner/Agent within 24 hours after every run-off event.

_____ Any damages to practices will be repaired immediately

_____ Silt fences and other sediment collecting practices will be cleaned within 24 hours of a run-off event.

_____ Practices will not be removed until permanent vegetation is established. (Downspout extenders, silt fences, etc.)

_____ Seeding/vegetation plan is ready to apply immediately after construction is complete and **temporary seeding of Annual Ryegrass will be planted during delay in construction of 20 days or greater.**

The undersigned agrees that all work shall be done in accordance with this erosion control plan, all requirements of the Marquette County Zoning Ordinance and all applicable laws, codes and regulations of the State of Wisconsin and that the information is true to the best of his/her knowledge. Any deviation from the design or maintenance requirements of this plan shall constitute a violation and be subject to enforcement action under section 70.67 of the Marquette County Zoning Ordinance. The undersigned grants permission for the Marquette County Land and Water Conservation Department, its agents or designees, to enter the premises and inspect the work to determine compliance with this plan.

Signed (Landowner or Agent)

Date

Printed Name: _____ Phone (if different than landowner): _____

FEES	
Erosion Control Plan	\$50.00
Infiltration Plan	\$50.00

Completed applications can be mailed, along with a check or money order, to:

Marquette County Land & Water Conservation Department
438 Industrial Drive, Suite 1
Westfield, WI 53964

Cash, Check, or Credit Card Accepted

When paying with a credit card, you must include a receipt/confirmation number of payment with your completed application or forward the payment receipt via email to:
patrick.kilbey@wi.nacdnet.net

OR

Submitted via email to:
patrick.kilbey@wi.nacdnet.net

FOR OFFICE USE ONLY

------	------------------

What? Construction and some land disturbing activities within shoreland land activities now require Erosion Control/Stormwater Management Plans to be approved by the Marquette County Land and Water Conservation Department.

Why? Sediment is the largest pollutant of Wisconsin's lakes and streams. Construction and land disturbing activities expose large amounts of bare soil to erosion. In shoreland areas, this eroded soil poses a great threat to the nearby water resources. Alterations of the landscape and increases in impervious surfaces also affect runoff. They may cause water to move faster and in larger quantities, force it to go where it had not gone previously, and prevent runoff from soaking into the ground.

Who? Me? Yes, if you are responsible for disturbing land - that is, exposing soil - in any of the following ways:
You are constructing a structure within 1,000 feet of the ordinary high water mark of a navigable lake, pond, or flowage, or within 300 feet of the ordinary high water mark of a navigable river or stream.
You are working greater than 300 feet from the ordinary high water mark and exceed 10,000 square feet in area.
You are working within 75-300 feet of the ordinary high water mark and exceed 1,000 square feet in area.
You are working within 35-75 feet of the ordinary high water mark and exceed 500 square feet in area.
You are working on a parcel that required a State approved subdivision plan.

What do I have to do? You are required to have Erosion Control and Stormwater Management Plans Approved by the Marquette County Land and Water Conservation Department. The plan will need to demonstrate erosion control activities that will be used on your site. These controls are typically easy and relatively inexpensive, and can be as simple as installing a silt fence on the downslope side of the disturbance. At the time of your Erosion Control Plan approval, the Land and Water Conservation Department will also determine if a Stormwater Management Plan is necessary.

And What if I don't care? If you don't submit an Erosion Control/Stormwater Management Plan for approval, you will not receive a permit, it is as simple as that. If you do have an Erosion Control/Stormwater Management Plan approved, but do not follow it, your permit will be revoked and you will be fined.

Help!! The Marquette County Land and Water Conservation Department has packets available to help you with your Erosion Control/Stormwater Management Plan. You can also find information on the Web at <https://dnr.wisconsin.gov/topic/Stormwater>.

For More Information... For questions about Erosion Control/Stormwater Management Plan contact the Marquette County Land and Water Conservation Department at (608) 296-2815 ext. 4. For general zoning or permit questions contact the Marquette County Zoning Department at (608) 297-3036.
