RECONNECTING TO ANY EXISTING POWTS

A County Reconnection Permit shall be obtained prior to:

- a. Construction of a structure to be connected to an existing POWTS.
- b. Disconnection of a structure from an existing POWTS and connection of another structure to the system, except as permitted under Section 74.09(C).
- c. Rebuilding a structure that is connected to a POWTS.

Plan/Permit Checklist for Reconnection of an existing Private On-site Wastewater Treatment System (POWTS)

The reconnection of this septic system must be done under the supervision of the licensed plumber who signs the permit application. A full application will include:

- A completed **Marquette County Sanitary Reconnection Permit** application.
- A completed form titled "**INSPECTION REPORT FOR EXISTING POWTS,**" which demonstrates that the existing system is suitable for continued use. The report shall include soil boring data adjacent to the existing drainfield for systems that lack such data on file in the Marquette County Zoning Office.
- A detailed plot plan dimensioned or drawn to scale on paper no smaller than 8 ½ inches by 11 inches in size. The plot plan shall delineate the lot size and show all system components, building sewer, well(s), building to be served by POWTS, benchmark and proposed wastewater flow calculations.
- \$200.00 application fee.
- Prior to backfilling and before the system may be put into use, an inspection of the materials used to reconnect the existing POWTS must be scheduled with the Marquette County Zoning Office.
