

From Bob and Glory Schrader

July 16, 2026

RECEIVED

JUL 20 2026

To whom it may concern:

We live @ N9332 Oakwood Lane on Silver Spring Lake, Neshkoro, WI. We are across the street neighbors to the address in question (N9317 Oakwood Ln.). We saw the retaining walls being built and wondered how they could be built so close to the neighboring lot lines and also wondered about how their construction would affect the drain off of rainwater unto neighboring lots. Because the construction of said retaining walls was completed we just assumed that the correct permits had been obtained for said construction.

We have lived @ our present address since 1988 and have seen several instances of variances being awarded after the fact to different residences on our lake regarding lot line encroachment and/or building projects that were in violation of our by laws. It seems to us that people just do what they want and then get a variance for work already completed. There should be some penalty (a fine, tear down or compensation to people wronged) for ignoring the laws of Marquette County and/or the by laws of our lake association.

Bob & Glory Schrader respectfully.
